

The Boat Manufacturing MACT

an EPA Workshop

The U.S. Environmental Protection Agency is offering a free workshop in three different locations in 2002 on the Boat Manufacturing MACT (66 FR 44217, 8/22/01). This workshop is appropriate for boat manufacturers affected by the rule as well as state regulators and inspectors.

- ! **January 17, 2002**, Sheraton Imperial, Research Triangle Park, NC, 9 a.m. to 5 p.m.
- ! **February 8, 2002**, IBEX conference, Ft. Lauderdale Convention Center
Two sessions offered: 9 a.m. to noon **or** 1 p.m. to 4 p.m.
- ! **April/May** (date and location to be determined), Chicago

Agenda

- T Overview of the boat manufacturing industry and the rule
- T Requirements for:
 - fiberglass boat manufacturing operations
 - aluminum recreational boat surface coating operations
- T Determining HAP content of regulated materials
- T The relationship between the Boat Manufacturing MACT and the General Provisions
- T The Boat Manufacturing MACT relationship to other rules such as Reinforced Plastics
- T Permitting
- T Where to find additional information from industry sources and the U.S. EPA

For more information contact Valerie Broadwell, U.S. EPA at 919-541-3310

Reasonable accommodations will be made for persons with special needs.
